

# The Origins of Digital Computers Selected Papers

Second Edition

Edited by Brian Randell

With 120 Figures

68

1975

45

Springer-Verlag  
New York Heidelberg Berlin 1975

# Contents

Chapter I	<b>Introduction</b>	1
Chapter II	<b>Analytical Engines</b>	7
	2.1. On the Mathematical Powers of the Calculating Engine. C. BABBAGE (1837)	17
	2.2. Report of the Committee . . . appointed to consider the advisability and to estimate the expense of constructing Mr. Babbage's Analytical Machine, and of printing tables by its means. C. W. MERRIFIELD (1879)	53
	2.3. Babbage's Analytical Engine. H. P. BABBAGE (1910)	65
	2.4. On a Proposed Analytical Machine. P. E. LUDGATE (1909)	71
	2.5. Essays on Automatics – Its Definition – Theoretical Extent of its Applications. L. TORRES Y QUEVEDO (1914)	87
	2.6. Electromechanical Calculating Machine. L. TORRES Y QUEVEDO (1920)	107
	2.7. Scheme of Assembly of a Machine Suitable for the Calculations of Celestial Méchanics. L. COUFFIGNAL (1938)	119
Chapter III	<b>Tabulating Machines</b>	125
	3.1. An Electric Tabulating System. H. HOLLERITH (1889)	129
	3.2. Calculating Machines: Their Principles and Evolution. L. COUFFIGNAL (1933)	141
	3.3. The Automatic Calculator IPM. H.-J. DREYER and A. WALTHER (1946)	151
Chapter IV	<b>Zuse and Schreyer</b>	155
	4.1. Method for Automatic Execution of Calculations with the aid of Computers. K. ZUSE (1936)	159
	4.2. Technical Computing Machines. H. SCHREYER (1939)	167
	4.3. The Outline of a Computer Development from Mechanics to Electronics. K. ZUSE (1962)	171
Chapter V	<b>Aiken and IBM</b>	187
	5.1. Proposed Automatic Calculating Machine. H. H. AIKEN (1937)	191
	5.2. The Automatic Sequence Controlled Calculator. H. H. AIKEN and G. M. HOPPER (1946)	199

	5.3. Electrons and Computation. W. J. ECKERT (1948)	219
	5.4. The IBM Card-Programmed Electronic Calculator. J. W. SHELDON and L. TATUM (1951)	229
Chapter VI	<b>Bell Telephone Laboratories</b>	237
	6.1. Computer. G. R. STIBITZ (1940)	241
	6.2. The Relay Interpolator. O. CESAREO (1946)	247
	6.3. The Ballistic Computer. J. JULEY (1947)	251
	6.4. A Bell Telephone Laboratories' Computing Machine. F. L. ALT (1948)	257
Chapter VII	<b>The Advent of Electronic Computers</b>	287
	7.1. Binary Calculation. E. W. PHILLIPS (1936)	293
	7.2. Computing Machine for the Solution of Large Systems of Linear Algebraic Equations. J. V. ATANASOFF (1940)	305
	7.3. The Bletchley Machines. D. MICHIE (1972)	327
	7.4. The Use of High Speed Vacuum Tube Devices for Calculating. J. W. MAUCHLY (1942)	329
	7.5. The Electronic Numerical Integrator and Computer. (ENIAC). H. H. GOLDSTINE and A. GOLDSTINE (1946)	333
Chapter VIII	<b>Stored Program Electronic Computers</b>	349
	8.1. First Draft of a Report on the EDVAC. J. VON NEUMANN (1945)	355
	8.2. Preparation of Problems for EDVAC-type Machines. J. W. MAUCHLY (1947)	365
	8.3. Preliminary Discussion of the Logical Design of an Electronic Computing Instrument. A. W. BURKS et al. (1946)	371
	8.4. Electronic Digital Computers. F. C. WILLIAMS and T. KILBURN (1948)	387
	8.5. The EDSAC. M. V. WILKES and W. RENWICK (1949)	389
	8.6. The EDSAC Demonstration. B. H. WORSLEY (1949)	395
	Bibliography	403
	Index to Bibliography	445
	Subject Index	449
